Knee pain can make daily life difficult, but a complete knee replacement is not always necessary. For patients suffering from damage in only one part of the knee, **Unicondylar Knee Replacement Surgery** (also called Partial Knee Replacement) is a smart, advanced solution.

At **Dr. Pravin Swami's Ortho & Joint Replacement Clinic, Solapur**, we provide modern, minimally invasive treatment that helps patients walk confidently and live pain-free.

What is Unicondylar Knee Replacement?

This surgery replaces **only the damaged compartment** of the knee joint, preserving healthy parts of the knee. It is ideal for:

- Osteoarthritis in just one compartment (medial/lateral)
- Localized knee damage
- Patients with stable ligaments and moderate activity levels

 Only the damaged part is replaced, leaving the rest of the knee intact.

Why Choose This Procedure?

- ✓ **Quick Recovery** – Walk within 1–2 days post-surgery
- ✓ **Smaller Incision** – Less trauma, faster healing
- ✓ **Natural Knee Movement** – Feels and functions like your original knee

- ✓ **Ideal for Active Seniors** – Improves mobility and independence
- ✓ **Less Risk** – Compared to total knee replacement

□ **Now, every step can be pain-free!**

About Dr. Pravin Swami

Dr. Pravin Swami is a leading **Orthopedic and Joint Replacement Surgeon** in Solapur with expertise in advanced knee surgeries. His approach focuses on preserving natural joint movement and ensuring a quick, pain-free recovery for his patients.

- 3 **Surgery** – Minimally invasive procedure (~1.5 hrs)
- 4 **Post-op Care** – Walk within 24–48 hours
- 5 **Rehabilitation** – Light physiotherapy; full recovery in 4–6 weeks

? **Frequently Asked Questions**

Q: Am I a good candidate for partial knee replacement?

If only one compartment of your knee is affected and your ligaments are stable – yes.

Q: How soon can I resume walking?

You'll be encouraged to start walking within 1–2 days.

Q: Is this safe for older patients?

Yes! In fact, it's highly recommended for seniors who want better movement and less downtime.
